EXPERIENCE

Firmhouse BV, Netherland — *Web Developer*
Ruby, Ruby on Rails, React

April 2022 - PRESENT

Firmhouse BV leads the way in Recurring Commerce worldwide, with expertise spanning Europe, North America, and China. Originating in Europe, we excel in navigating diverse local payment methods, laying the foundation for subscription-based services. Our innovative platform offers unparalleled flexibility, seamlessly integrating without the need for existing system or Payment Service Provider integration. We empower businesses to thrive in the dynamic world of Recurring Commerce.

- Played a pivotal role in the development of applications catering to a diverse clientele with a substantial customer base, working collaboratively with a team of developers
- Collaborated closely with the development team to introduce new features and optimize existing functionalities within our applications.
- Improved user experience through overhauling API endpoint documentation, fine-tuning request/response formats, and crafting insightful articles and guides, enabling clients to harness the full potential of our products.
- Ensured complete responsiveness and seamless integration of website frontend with the original Figma design, resulting in an enriched user interface.
- Contributed to the creation of clean, efficient code and participated in debugging and troubleshooting activities.

Integrify, Finland (Remote) — *Full Stack Developer Trainee*

August 2021 - April 2022

- Worked closely with the design team to interpret designs and create pixel perfect websites using HTML, CSS (SCSS), JavaScript and TypeScript.
- Collaborated with the development team in building highly responsive and accessible applications.
- On the Frontend projects, I worked with modern technologies like React and state management tools like Redux and Redux tool kit.
- Worked with my team to build server-side applications with NodeJS and deployed applications with MongoDB databases.

ACHIEVEMENTS

Developer Mentor - Mentoring young girls in my home country who want to make a career in Tech.

LANGUAGES

- English (Native speaker)
- Dutch (A2)

She Code Africa, Nigeria (Remote) — *Site Reliability Engineer Trainee*

February 2021 - April 2021

- Gained knowledge of DevOps culture and used basic Linux commands to implement simple Linux administration.
- Virtualization, dockerization, and containerization of applications using Vagrant, Docker, and Cloud Build.
- Implementing Infrastructure as Code, Pipeline as code concepts using CI/CD and infrastructure tools (Jenkins CI, Terraform, Circle CI).

University of Benin, Nigeria — *Laboratory Technologist*

December 2010 - April 2021

- Designed Research project protocols for Post-graduate and undergraduate students in my Faculty.
- Taught laboratory techniques and best practices to undergraduate students
- Collaborated with Senior Technicians to design research methodologies and also coordinated practicals and assigned workloads to students.
